PRODUCT CATALOG

Our Company

K2 Ventures International

Some of the world's most powerful ingredients grow in the most uncompromising places — high-altitude forests, wild terrain, and carefully tended organic farms across India.

We find them, verify them,
and bring them to you.

K2 Ventures International is an India-based exporter and contract manufacturer specializing in premium mushrooms, botanical extracts, and functional ingredients for global markets. We work close to the source — with foragers, farmers, and certified facilities — so that by the time an ingredient reaches your business, its quality, origin, and integrity are beyond question.

For brands, businesses, and culinary professionals that refuse to compromise on what they offer, we exist to make sourcing simpler, more transparent, and more reliable.

This catalog is where it begins.
